28 May 2018

Dear Sijin Kumar Adukkam Veedu,

We are pleased to invite you to present your research on sea level change at the *Impacts of Sea-Level Rise Meeting from Past to Present (iSLR)* from 26-29 August 2018 in Utrecht, The Netherlands.

This is a joint conference of INQUA (International Union for Quaternary Research) and PAGES (Past Global Changes), specifically aimed at early career researchers in the realm of sea-level change research.

Your paper, entitled "*Sea level rise and monsoon intensification from the Last Glacial Maximum to recent: oxygen isotope record from the Bay of Bengal and the Andaman Sea*", is an important contribution to the scientific program and we look forward to its presentation. This letter serves as your official invitation.

We are pleased to announce that we are able to provide 750 EURO to assist you with your travel expenses. Please note that you are otherwise financially responsible for your meeting registration, travel arrangements, local expenses and any other incidental expenses (such as medical emergencies, lost or stolen property).

Please consult www.islr18.org for important information about the meeting.

We look forward to seeing you at the iSLR18 in Utrecht in August.

Sincerely,

Dr. Ir. Aimée Slangen

Chair of the iSLR18 ECR Organizing Committee

NIOZ Royal Netherlands Institute for Sea Research, Department of Estuarine & Delta Systems
