Dear Sandeep Kizhur:

On behalf of the Geochemical Society, I am pleased to inform you that you have been selected to receive a grant to help support your participation in the Goldschmidt2018 conference in Boston. This grant will provide you with waived abstract and registration fees for the conference.

To register for the conference please sign in to your website account and go to Registration. You will need to enter your address and other details. Please indicate if you require a student or full registration. Please also select yes for a printed volume. You will be treated as members for the sake of this process so please select the yes you are a member option. You will not be registering as K-12 participants, please select no in that box.

The category of registration you will need is Conference Grant Recipient.

The code you require to register at this rate is: Harvard

You can then select tickets for any social events or workshops you wish to attend. As a grant holder from a low income country you are invited to attend the Harvard Mineralogical Museum social event as the guest of the conference. Your ticket costs will be covered, you can register for this event using the code Hamlin. For any other events you will need to arrange payment yourself.

We also encourage you to participate in the mentorship program, which pairs students and early career delegates with experienced scientists who can help you navigate the conference. To join this program, simply select the theme you are most interested in and that you wish to be a mentee when you reach that page in the registration process.

If you are no longer planning to attend the conference, kindly notify us so that funds may be reallocated to another student.

At the end of the conference, you will receive a survey by email regarding your experience at the Goldschmidt meeting. By accepting the grant funds, you agree to complete this survey. We hope you have a wonderful time at the meeting in Boston and take full advantage of the opportunity to meet other geochemists, present your work, and discuss the most exciting things happening in our field.

Sincerely,

Kevin Johnson
