- : Dr. V. Nagaraj
Asst Professor, Dept. of Economics, CUK.
- Members** : All Staff, Research Scholars &
Students of Department of Economics

Two Day International Conference during March 5 and 6, 2020 on

Sustainable development and Education

Key Words: Sustainable development, Education, climate change, Innovation and adaptation, renewable energy and new job opportunities, Skilling and Training.

A quality education is the foundation of sustainable development, and therefore of the Sustainable Development Goals. As a policy intervention, education is a force multiplier which enables self-reliance, boosts economic growth by enhancing skills, and improves people's lives by opening up opportunities for better livelihoods (United Nations Organization). While global population is expected to increase to 9.7 billion by 2050 without commensurate increase in resources each and every individual across societies need to learn to live together sustainably. We need to take action responsibly based on the understanding that what we do today can have implications on the lives of people and the planet in future. Formal education system has a critical role to play here to influence the thinking and behaviour of people in a sustainable manner. Education has to be reoriented towards helping people develop knowledge, skills, values and behaviours needed for sustainable development. In this background, the conference will be focusing on sustainable development with an emphasis on the question "What achieved? What ought to be?" This is expected to be a forum for deliberations and discussions on challenges and issues of sustainable development by policy makers, academicians, researchers and leading social scientists.

During the conference various sessions on following topics were held. Agriculture and Sustainable Practices - Sustainable Development and Education - Industrial Development and Sustainability - Sustainable Development Goals - Economics and Demography - Health and Nutrition - Energy, Environment and Development - Economics of Water - Climate Change, Mitigation and Adaptation - Food Security - Urbanisation and Sustainable Practices - International Trade and Sustainable development - Finance and Economic Sustainability - Fiscal policy - Macroeconomic Developments - Banking and Financial Inclusion - SHGs and Empowerment - Monetary policy and Economic Stability - Poverty, Inequality and Unemployment - Human Development and Education - Innovation and Waste Management - India's Climate Initiatives

During the two day event, about 250 participants were participated in the discussion and deliberations.
